Key Findings
Long Walking Distances

- Long intersection crossing distances
  - 4 crosswalks over 100 feet.

- Long Distance between crosswalks
  - Up to 1,233 feet.
Intersection Safety

• 6 out of 11 intersections do not have pedestrian crossing signals.
• 5 out of 11 intersections do not provide adequate crossing times.
Intersection Safety

- 48% of non-light-controlled intersection crosswalks have significant wear.
Intersection Safety

- **44%** of intersection curb ramps are non-ADA compliant.
Transit Rider and Cyclist Support

- Only 5 locations along the avenue that have places to lock a bike.
- 4 trolley and bus stops are not directly served by crosswalks.
- Only 1 transit stop has a formal bench or areas to rest.
Corridor Wide Strategies
STRATEGY

Slow cars and calm traffic
STRATEGY

Make intersections safe for all
STRATEGY

Complete the avenue's ADA infrastructure and walking path
STRATEGY
Decrease crossing distances for pedestrians and cyclists
Continue to create an environment that is safe and inviting for all.
Best Practices
Tactical Urbanism
Intersection Specific Recommendations
